List all Drinking-Water Systems (if any), which receive all of their drinking water from your system:

Drinking Water System Name	Drinking Water System Number
Not Applicable	

Did you provide a copy of your annual report to all Drinking-Water System owners that are connected to you and to whom you provide all of its drinking water?  
Yes [ ] No [X]

Indicate how you notified system users that your annual report is available, and is free of charge.

**Description of the Drinking-Water System**

The Lutterworth Well Supply includes 2 groundwater wells providing duty/standby capability. Three 450L pressure tanks are located on the distribution header and provide a minimum pump cycle time of 4 minutes. Uranium removal is accomplished with the use of one Kinetico media vessel using ion exchange technology along with a 20um cartridge filter upstream of the ion exchange vessel. Disinfection is accomplished using 12% undiluted sodium hypochlorite injected in the common well pump discharge header just upstream of 4 - 452L chlorine contact tanks. A continuous on-line free chlorine residual analyzer is located downstream of the chlorine contact tanks. Magnetic flow meters are located on each well pump discharge line and on the distribution header. There is a emergency standby diesel generator on site.

**List all water treatment chemicals used over this reporting period**

Sodium Hypochlorite

**Were any significant expenses incurred to?**

- Install required equipment
- Repair required equipment
- Replace required equipment

**Please provide a brief description and a breakdown of monetary expenses incurred**

none

Provide details on the notices submitted in accordance with subsection 18(1) of the Safe Drinking-Water Act or section 16-4 of Schedule 16 of O.Reg.170/03 and reported to Spills Action Centre

The Ontario Clean Water Agency aims to strictly adhere to operational and compliance limits, however certain operational circumstances may cause results to be temporarily outside of the limits. Limits that are momentarily surpassed as a result of pump start-ups, power outages/generator tests, pump rotation, calibrations, alarm verification, etc are a normal part of operations and do not indicate a true exceedance. A true exceedance will be noted and documented within the report.
