

During the summer of 2020, please note the following amendments to operations at waste sites:

Hours of Operation

- There are no changes to hours of operation at any site.

Accepted Materials:

Scotch Line Landfill:

- The Diabetes Canada drop-off box and reuse centre at the Scotch Line Landfill will remain closed.
- All other waste types will be accepted at the Scotch Line Landfill.
- Tipping fees will apply and must be paid in exact change.

Ingoldsby Transfer Station:

- Ingoldsby Transfer Station will resume acceptance of brush.
- Tipping fees will apply and must be paid in exact change.

All Other Sites:

- Iron Mine, Little Gull and Irondale sites are accepting bagged household waste (up to 3 bags per week), blue box recycling and scrap metal.

Payment Methods:

Due to the naturally unsanitary nature of waste sites and our inability to ensure consistent and reliable sanitation measures for cash handling, sites will be accepting **only exact change** for tipping fee payment. Please come prepared with a variety of bills and coins in anticipation of not receiving change.

Contactless payment options will be implemented at Scotch Line and Ingoldsby in the coming weeks, which will allow users to pay using credit card or debit, eliminating the need to tender exact change. Updates will be posted here and on the Township's social media channels when this is available.

Tipping fees can be found on the Township of Minden Hills' website at <https://mindenhills.ca/environmental-services/landfill-operations/>.

Practicing Safe Site Usage

- Higher than normal volumes of site traffic are anticipated over the next week, so please be patient and drive carefully on site.
- Maintain social distance from site staff and other site users.

- We strongly encourage the use of masks on site, especially if interacting with a staff person.
- We strongly encourage you to use hand sanitizer after attending the site, and to thoroughly wash your hands as soon as possible.
- Avoid touching railings, bins, door handles and other objects on site.
