- Students must use template attached for their design.

Only in blue. For this year's banners we are looking for all shades of blue. This is called monochromatic which is a color scheme based on only one, single color tint. It uses only variations (shades) of a single hue, made by altering the saturation and brightness of the base color. Black and white colors are always added, as they in fact are the brightest, resp. the darkest shade of the color.

Suggested Designs (We just Googled 'simple design' for these examples)
